RE: Recommendation and Referral

Dear Mr. Stokes,

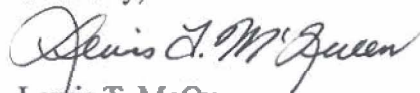

This letter of recommendation and referral is written on behalf of K.P. Meiring Construction Company. The City of Greenfield Fire Department has been very fortunate to work with K.P. Meiring on the renovation and addition of the Fire Department Headquarters located at 17 West South St., Greenfield Indiana.

The city was able to reuse approximately 10,000 square feet of existing space, as well as add over 8,000 additional square feet on two floors for sleeping areas, administrative offices and separate men's and women's facilities. The finished project has far and away exceeded all of our expectations. The blending of the existing structure with the new structure is seamless and most people drive by the finished building now and compliment that they never realized our facility was so big.

K.P. Meiring has been exceptionally good to work with. Their people are timely, professional and consistent in the pursuit of a great finished product at a reasonable cost. This company keeps the customer in mind and seems to anticipate the needs and best usage of space as needed. K.P. Meiring has also been very responsive in dealing with issues of fit / finish as they have arisen. At no time in our dealings with this company has an issue gone unresolved. In fact, all of our issues have been resolved to our complete satisfaction, with K.P. Meiring providing multiple options for resolution and allowing us to have a hand in the decision making process. We are pleased with our building and the finished product K.P. Meiring provided

As Chief of the Greenfield Fire Department, I would not hesitate to use K.P. Meiring Construction Company in any of our construction needs in the future of our fast growing city.

Sincerely,

Lewis T. McQueen  
Chief of Department
